PROFESSIONAL SUMMARY

Aspiring Software Engineer and B.Tech CSE student with a strong foundation in **Data Structures, Algorithms, and Linux System Administration**. Proven track record of solving **101+ LeetCode problems** and delivering full-stack projects using **React and MySQL**. Certified **Red Hat System Administrator (RH124/RH134)** focused on scalable systems and optimized code performance.

EDUCATION

Chitkara University <i>B.Tech in Computer Science Engineering; CGPA: 8.78</i>	Rajpura, Punjab 2024 – 2028
Tinu Public School <i>Class XII (CBSE)</i>	Sangam Vihar, New Delhi 2023

TECHNICAL SKILLS

Languages: Java, C++, SQL, JavaScript, HTML, CSS
Linux & Systems: LVM, Network Security, User Management
Tools & Frameworks: React, Node.js, Git, GitHub, Postman, MySQL, Linux CLI
Core CS: Data Structures, Algorithms, OOPs, Operating Systems, DBMS

CERTIFICATIONS

- **Red Hat System Administration II (RH134):** Advanced Linux administration covering **LVM storage, firewall-cmd, and SELinux** protocols. 2026
- **Red Hat System Administration I (RH124):** Core competencies in command-line automation, system boot processes, and **Vim** editor workflows. 2026
- **Deloitte Australia - Data Analytics Job Simulation** Certified by **Deloitte Australia Forage** Completed Deloitte Australia Data Analytics Job Simulation (Forage), applying data analysis, EDA, data visualization, Excel, dashboards, and business intelligence concepts to solve client-based problems and generate data-driven insights.

PROJECTS

- F1 Web Platform** | *JavaScript, React, Vercel* 2025
- Developed a responsive and visually engaging frontend for an F1-themed platform with modern UI/UX design principles.
 - Implemented interactive components and optimized page performance for smooth user experience.
- E-Commerce Platform** | *React, JavaScript, Tailwind CSS* 2024
- Engineered a high-performance frontend using **React Hooks** to optimize component render cycles.
 - Developed a dynamic **Context API** state management system for real-time shopping cart updates.
 - Optimized asset loading and component architecture, improving initial page load speed by **15%**.

ACHIEVEMENTS

- **LeetCode:** Solved **110+ problems**; consistently utilize **Big O analysis** to ensure optimal time complexity solutions.
- **IGNITE Hackathon (2026):** Finalist (**3rd Rank / 100+ teams**) at Panjab University Chandigarh; led frontend development of IndiWealth using React, implementing responsive UI, financial dashboards, and interactive data visualization features.
- **Supply Ai (2025):** Selected for the **Developed the complete frontend of SupplyAI, focusing on responsive UI/UX and user-friendly design.** 20 top teams out of 50.
